

## Instructions for Authors

*Note to NIH Grant Recipients:* Articles accepted for publication from authors who have indicated that the underlying research reported in their articles was supported by an NIH grant will be sent by Elsevier to PubMed Central (PMC) for public access posting 12 months after final publication. The version of the article provided by Elsevier will be the final peer-reviewed manuscript that was accepted for publication and sent to Elsevier's production department, and which reflects author-agreed changes made in response to peer-reviewed comments. Elsevier will authorize the author manuscript's public access posting 12 months after final publication. Following the deposit by Elsevier, authors will receive further communication from the NIH with respect to the submission.

### General Information

*The Journal of Pain* publishes original articles related to all aspects of pain and pain management and welcomes submissions from clinical and basic researchers, medical specialists, psychologists, nurses, physical therapists, social workers, and workers in related fields. *The Journal of Pain* is interdisciplinary in focus and committed to advancing knowledge about pain mechanisms and pain management. *The Journal* will publish reports of original clinical research, reports of original basic research, Focus Articles, Critical Reviews, Case Reviews in Pain, and Letters to the Editor. Manuscripts considered to provide particularly innovative or groundbreaking findings may be designated for fast-track handling by the editorial board, and such articles may be published on an expedited basis. Fast-track determination will be made by the Editor-in-Chief in consultation with the editorial board. Authors may request consideration of fast-track designation but must provide rationale for this in their cover letter. The Journal does not publish case reports or studies that include open-label trials.

### Manuscript Preparation

Authors must submit manuscripts electronically, uploading documents to the submission website (<http://ees.elsevier.com/jpain/>). The system will convert documents to PDF files. Authors are encouraged to submit manuscripts in Microsoft Word.

**Please follow the instructions below when organizing manuscripts:**

Pages must be numbered consecutively, beginning with the title page. Materials should be presented in this order: cover letter; manuscript (as a single file that contains the following: title page, abstract, perspective, text, acknowledgments, references, figure legends); figures; tables.

**Title page (page 1)** — The title should be a concise and informative description of the study and should indicate animal species if the research was conducted on nonhuman animals. The title page should include the authors' names, department(s), institution where the work was done, and institutional affiliations of

authors. The corresponding author must be clearly identified and phone/fax/e-mail information must be provided. The title page should include a short running title (45 characters, excluding spaces) and up to six words to be used for indexing.

**Abstract (page 2)** — An abstract of 200 words or less should describe concisely the purpose of the study, the main findings, and conclusions, all in one paragraph without subheadings. References should not be included in the abstract.

**Perspective** — This item, limited to 50 words, should appear at the end of the abstract. The perspective presents a synopsis of the work to facilitate understanding of its significance. Authors of basic science reports should highlight the potential clinical relevance of their results for the benefit of clinical readers. Authors of clinical science reports should highlight the underlying mechanisms for the results, for the benefit of clinical scientists and basic scientists. Example: "Perspective: This article presents the psychometric properties of a new measure of spouse responses to patient chronic pain and well behavior. This measure could potentially

help clinicians who seek to assess how spouse responses may contribute to patient pain and disability." References should not be included in the perspective.

**Key words** — Five key words should be provided following the perspective, for indexing purposes.

**Text** — The text of the article should include the following sections: *Introduction*, *Materials and Methods*, *Results*, and *Discussion*. Subheadings in the *Materials and Methods*, *Results*, *Discussion*, and *Acknowledgments* sections should be used as necessary to aid organization and presentation, but subheadings and sections should not be numbered. All sections of the text should be written concisely. Limit the *Introduction* to 600 words and the *Discussion* to 1500 words. Note that section labels may not apply to some article types, including Focus Articles and Critical Review Articles. Footnotes are not permitted in the text. Information must be cited parenthetically, or within the references section.

**Human subjects** — Articles involving research conducted in human subjects must include statements in *Materials and Methods* indicating that 1) approval by the Institutional Review Board was granted; and 2) that informed consent was obtained from each subject. Subjects should be identified only by number, not name or initials. Articles involving research conducted in non-human animals must include a statement in *Materials and Methods*, indicating approval by the Institutional Review Board and that the care and use of animals conformed to applicable national/international guidelines.

**CONSORT Statements** — For clinical trials, authors must prepare a CONSORT statement. This should be presented as a flow chart diagram, preferably labeled as Figure 1, and should be cited within the text. This statement gives readers important information about procedures used during trials. See <http://www.consort-statement.org/> for details.

**Non-human subjects** — In the *Materials and Methods* section, articles involving research conducted in non-human subjects must include 1) a statement indicating approval by the Institutional Review Board and that the care and use of animals conformed to applicable national/international guidelines; and 2) information about the source (vendor and location) of animals. If anesthesia was used, the anesthetic, dose, and duration of surgery must be provided, as well as information about any intra- and/or post-operative drugs (ie drug, dose, and inter-dosing interval, if given more than once).

**Acknowledgments** — The *Acknowledgments* section must follow the *Discussion*. Research funding sources must be acknowledged, including corporate, grant, institutional, or departmental funds. If this does not apply, authors must provide a brief explanation in the covering letter accompanying the manuscript. In this

section, all authors should disclose any potential conflicts of interest. This includes honoraria, travel to conferences, consultancies, stock ownership (excluding publicly owned mutual funds), equity interests, and patent-licensing arrangements (particularly if a commercial product is noted in the article).

**Figure legends** — A legend must be provided for each figure. Legends should be placed on the same page, following the *Acknowledgments*, and should appear in numerical order.

**Figures** — All figures must be cited in the text; figures must be cited in consecutive order (this also applies to individual panels within figures). Computer-generated figures should use solid fills or cross-hatching, not tonal shading. Figure legends should be presented separately and placed in the manuscript after the list of references. Figure legends should be brief and not repetitive of description in the text. Color figures may be accepted but any cost related to print production is the responsibility of the author. However, authors who are members of the American Pain Society may qualify for complimentary production of essential color figures. Also, color figures may be published in the electronic version of *The Journal* at no cost to the authors, regardless of membership in the American Pain Society.

TIFF and EPS are the preferred formats for artwork. All type fonts used in studio-created artwork must be either "embedded" in the file or supplied separately. All graphic files supplied as bitmap format (not vector format) in TIFF, JPEG, or GIF must be submitted in sufficiently high resolution (240-300 dpi for grayscale or color images and 600-1000 dpi for line art) to allow for printing. See Elsevier's website for guidelines for preparing electronic artwork: <http://www.elsevier.com/artworkinstructions>

**Cover images** — *The Journal of Pain* will publish appropriate images on the journal's cover. Selected figures may accompany a submitted manuscript (authors should make a note in the covering letter), or images may be submitted individually. Authors are encouraged to submit art for consideration; materials may be uploaded to <http://ees.elsevier.com/jpain>.

**Tables** — All tables must be cited in the text; tables must be cited in consecutive order. Tables should be comprehensive without reference to the text and should not be repetitive of descriptions in the text. Every table should consist of two or more columns; tables with only one column will be treated as lists and incorporated into the text. Explanatory matter and source notations for borrowed or adapted tables should be placed in a table footnote, not in the title or table body.

**References** — The reference list should appear at the end of the manuscript. The list must be in alphabetical order, according to the surname of the first author. In

cases of multiple citations by the same first author, references should be listed by chronological date of the publication. In cases of multiple citations by the same first author and different second, third, etc. authors, references should be cited in alphabetical order according to the surname of the second, third, etc. authors. Within the text, papers should be cited using superscript numbers that correspond to the alphabetized reference list as follows: "Similar changes were demonstrated in the cingulate cortex.<sup>15</sup>" All authors must be listed in the references; the use of *et al* is not permitted. Journal abbreviations should conform to the style used in *Index Medicus*, National Library of Medicine. Unpublished data, personal communications, and abstracts that cannot be retrieved by readers (eg, some meeting abstracts), and other inaccessible materials should not be listed as references. Unpublished materials may be cited parenthetically within the text, noting the authors and the year in which the research was conducted. For manuscripts containing citations that are in press, authors must have electronic copies immediately available in case reviewers/editors request these materials. If all or part of this research was presented in Abstract form at an American Pain Society annual meeting, please note this at the end of the *Introduction* and include the citation in the list of References, citing abstracts published in *The Journal of Pain's* annual meeting supplemental issue. For information on formatting a specific Abstract reference, contact the Editorial Office at [jpain@jpain.us](mailto:jpain@jpain.us).

**Permissions** — To use tables and figures borrowed or adapted from another source, authors must obtain permission from the copyright holder (usually the publisher). This is necessary even if you are the author of the borrowed material. It is essential to begin the process of obtaining permissions early; a delay may require removing the copyrighted material from the article. Give the source of a borrowed table in a footnote to the table; give the source of a borrowed figure in the legend of the figure. The source must also appear in the list of references. Use exact wording required by the copyright holder. Send copies of the letter granting permission, identified by table or figure number, to the Editorial Office via fax at (312) 275-7776.

To secure permission for materials published in *The Journal of Pain*, please visit [www.elsevier.com/permissions](http://www.elsevier.com/permissions).

**Submission of materials, etc.** — Manuscripts must be submitted electronically (see directions at <http://ees.elsevier.com/jpain/>).

**A Mandatory Submission Form (pdf) must accompany all submissions.** This form should be downloaded, signed, and faxed to (312) 275-7776.

**Accepted manuscripts** — Page proofs will be sent via e-mail as a .pdf file. Authors are asked to return proofs within 48 hours by e-mail or fax. There are no author page charges for *The Journal of Pain*.

**Note to NIH Grant Recipients:** Articles accepted for publication from authors who have indicated that the underlying research reported in their articles was supported by an NIH grant will be sent by Elsevier to PubMed Central (PMC) for public access posting 12 months after final publication. The version of the article provided by Elsevier will be the final peer-reviewed manuscript that was accepted for publication and sent to Elsevier's production department, and which reflects author-agreed changes made in response to peer-review comments. Elsevier will authorize the author manuscript's public access posting 12 months after final publication. Following the deposit by Elsevier, authors will receive further communication from the NIH with respect to the submission.

**Reprints** — For information about reprints, e-mail: [authorsupport@elsevier.com](mailto:authorsupport@elsevier.com).

Meeting announcements and press releases are not published in *The Journal*.

## Special Features

**Focus Articles/Critical Reviews** — A Focus Article may present a hypothesis or state a position on a basic scientific or clinical topic related to pain. The position may be provocative, but must be based on scientific evidence, and referenced accordingly. A Review Article offers a summary of a topic and includes pertinent literature to present a position. These are not intended for the presentation of unpublished data. Authors wishing to submit a Focus Article or Critical Review should contact the editor ([jpain@jpain.us](mailto:jpain@jpain.us)). The title/topic of the article, a short outline of proposed content, and intended date of submission should be provided. Focus Articles will undergo the same rigorous review as unsolicited manuscripts of original research. Agreement of the editor to receive and consider an article does not imply acceptance.

**Commentaries on Focus Articles/Critical Reviews** — The editor may solicit commentaries on Focus Articles or Critical Reviews. Commentaries should be limited to less than 2000 words and are subject to editorial review.

**Case Reviews in Pain** — This feature is intended to translate science and clinical expertise through a case study format. A brief case study will describe the clinical course of an individual with a common or complex pain syndrome. Scientists, clinicians, and other professionals with expertise relevant to the case will be invited to provide commentary reflecting their area of interest. The case study author, in consultation with the Associate Editor, will solicit responses; the case studies and responses will be published simultaneously. Guidelines for preparing commentaries will be provided by the Associate Editor.

Individual authors wishing to submit a case report for consideration should propose the title/topic, a brief outline, and names of suggested commentators to Judith A. Paice, Associate Editor for Case Studies in Pain, at [j-paice@northwestern.edu](mailto:j-paice@northwestern.edu). Case studies will undergo peer review; agreement to consider manuscripts does not imply acceptance.

Approved Case Studies and responses must be submitted electronically at <http://ees.elsevier.com/jpain/>.

**Letters to the Editor** — Letters to the Editor commenting on published items are encouraged. Letters should be double-spaced and limited to 500 words or less, though lengthier pieces may be approved by the Editor. The published item must be cited in the References section; authors should refer to The Journal's instructions for proper citation formatting. The letter will be shared with the author(s) of the original article, who will have the chance to respond. The Journal will also consider general letters relevant to the study or treatment of pain; these letters need not refer to a published article. The guidelines noted above also apply to stand-alone letters. All letters are subject to editorial review. Meeting announcements and press releases are not published in *The Journal of Pain*.
