

Author Index for Abstracts

Abbott, Rebecca

Multi-Muscle Deep Learning Segmentation to Automate the Quantification of Muscle Fat Infiltration in Cervical Spine Conditions. Pain Imaging

Abili, Oroló Davies

– Naloxone Education: Patient Perspectives. Pain Education

– Safe Opioid Prescribing Project. Pain Education

– Opioid Safety: Complex Pain Case Conferences. Primary Care

Addison, Adriana

Pain catastrophizing mediates ethnic/race group differences and pain-related outcomes in adults with or at risk for knee osteoarthritis. Pain and Disparities

Agurto, Carla

Preliminary Evaluation of Phenotypic Features from Clinical Interactions. Measurement of Pain and its impact

Ahn, Christine

IRE α -XBP1s activation in leukocytes is associated with the level of exposure to paclitaxel in CIPN patients. Basic Science

Akeju, Oluwaseun

– Thalamic Neurometabolite Alterations in Patients with Knee Osteoarthritis Before and After Total Knee Replacement. Pain Imaging

– Neuroinflammatory and functional connectivity signatures in radicular and axial chronic low back pain. Pain Imaging

Albrecht, Daniel

– Neuroinflammatory and functional connectivity signatures in radicular and axial chronic low back pain. Pain Imaging

– Thalamic Neurometabolite Alterations in Patients with Knee Osteoarthritis Before and After Total Knee Replacement. Pain Imaging

Al-Hasani, Ream

Peripheral kappa opioid receptor activation drives cold hypersensitivity in mice. Basic Science

Ali, Lalah

Development of an activated microglia cell line model for screening lipid nanoparticle formulations of BDNF siRNA for neuropathic pain therapy. Basic Science

Allen, Jason

Alterations in Gray Matter Volume and GABA in Veterans Treated with Percutaneous Electric Neural Field Stimulation (PENFS). Pain Imaging

Allen, Kyle

– Increasing Age Alters the Development of Gait Compensations Following Meniscal Injury in Rats. Basic Science

– Pain differences in sympathetic nervous system reactivity during simple and complex walking tasks: potential cerebral mechanisms. Pain Imaging

Allen Watts, Kristen

Predictors for Pain Severity, Interference, and the Use of Tertiary Providers among Community Dwelling, Southern Adults. Pain and Disparities

Alshelh, Zeynab

– Neuroinflammatory and functional connectivity signatures in radicular and axial chronic low back pain. Pain Imaging

– Thalamic Neurometabolite Alterations in Patients with Knee Osteoarthritis Before and After Total Knee Replacement. Pain Imaging

Andronesi, Ovidiu C.

Brain metabolite concentration in pain processing regions is linked with multidimensional morbidity in fibromyalgia - a voxel-wise 3D MR Spectroscopic Imaging study. Basic Science

Anzolin, Alessandra

– Brain-to-brain patient-clinician connectivity is directionally modulated by chronic low back pain therapy: an electroencephalography hyperscan approach. Pain Imaging

– Dynamic functional connectivity underlying temporal summation of pain in fibromyalgia. Pain Imaging

– Brain and Behavioral Correlates of the Patient-Clinician Relationship: A longitudinal fMRI hyper-scanning study of chronic pain patients. Pain Imaging

Arackal, Joel S.

Peripheral kappa opioid receptor activation drives cold hypersensitivity in mice. Basic Science

Archer, Kristin R.

– Impact of COVID-19 on a Pragmatic, Cluster Randomized Clinical Trial for Fibromyalgia. Clinical Trials

– Fibromyalgia Transcutaneous Electrical Nerve Stimulation in Physical Therapy Study (FM TIPS): an embedded pragmatic clinical trial in physical therapy clinics. Interventional approaches to pain management

Arendt-Nielsen, Lars

Effects of Conditioned Pain Modulation on Spread of Hyperalgesia after Intramuscular Capsaicin in Humans. Basic Science

Arif, Muhammad

The effect of gender, opioid use/risk, duration of chronic pain and associated factors on response to medical/procedural intervention in chronic pain patients. Interventional approaches to pain management

Arnold, Brent

The effects of active and non-active virtual reality games on experimentally induced pain in young, healthy adults. Interventional approaches to pain management

Aroke, Edwin

– Perceived injustice mediates the relationship between socioeconomic status and physical function among individuals with chronic low back pain. Pain and Disparities

– Depressive Symptoms Mediate the Relationship Between 25-Hydroxy Vitamin D and Self-Reported Pain Intensity in a Sample of Individuals Living with Non-Specific Chronic Low Back Pain. Psychosocial

– Sleep efficiency and physical performance differences between pain-free individuals and individuals with chronic lower back pain. Psychosocial

Arora, Vipin

Capsaicin-induced depolymerization of axonal microtubules mediates analgesia for trigeminal neuropathic pain. Craniofacial Pain

Arris, Dominic

Peripheral Contribution of BDNF/TrkB signaling in Mediating Oral Cancer Pain. Basic Science

Asgar, Jamila

Capsaicin-induced depolymerization of axonal microtubules mediates analgesia for trigeminal neuropathic pain. Craniofacial Pain

Astolfi, Laura

Brain-to-brain patient-clinician connectivity is directionally modulated by chronic low back pain therapy: an electroencephalography hyperscan approach. Pain Imaging

Audette, Joseph

S1 functional connectivity during rest and electro-acupuncture tracks median nerve and patient function improvement following acupuncture for carpal tunnel syndrome. Pain Imaging

Austah, Obadah

Mechanisms of Stem Cell-mediated Antinociception. Basic Science

Avis, Nancy

IRE α -XBP1s activation in leukocytes is associated with the level of exposure to paclitaxel in CIPN patients. Basic Science

Azizoddin, Desiree R.

Introversion buffers pandemic-related increases in chronic pain impact. Psychosocial

Baker, Justin

Preliminary Evaluation of Phenotypic Features from Clinical Interactions. Measurement of Pain and its impact

Bakshi, Rahm

Dietary Cholesterol is Associated with Increased Pain Sensitivity in Individuals with Chronic Low Back Pain. Complementary and Integrative Medicine

Ballinger, Scott

Mitochondrial DNA Copy Number and Damage in People with HIV and Chronic Pain. Measurement of Pain and its impact

Barragan-Iglesias, Paulino

The impact of inflammatory mediators on the landscape of nascent translation in the dorsal root ganglion. Basic Science

Barron, Daniel

Preliminary Evaluation of Phenotypic Features from Clinical Interactions. Measurement of Pain and its impact

Bartley, Emily

– Exploring the Multidimensional Nature of Resilience in Pain and Function among Aging Adults with Chronic Low Back Pain. Geriatric Pain

– Pain catastrophizing mediates ethnic/race group differences and pain-related outcomes in adults with or at risk for knee osteoarthritis. Pain and Disparities

Barton Zuckerman, Maya

– Brain-to-brain patient-clinician connectivity is directionally modulated by chronic low back pain therapy: an electroencephalography hyperscan approach. Pain Imaging

– Brain and Behavioral Correlates of the Patient-Clinician Relationship: A longitudinal fMRI hyper-scanning study of chronic pain patients. Pain Imaging

Basavarajappa, Lokesh

The impact of inflammatory mediators on the landscape of nascent translation in the dorsal root ganglion-Baum. Basic Science

Baumgartner, Jennifer N.

– Slower dispositional respiration is associated with lower pain sensitivity, higher mindfulness and multiple unique neural mechanisms. Pain Imaging

– Prefrontal cortico-thalamic regulation of pain by mindfulness meditation. Pain Imaging

Bayman, Emine O.

– Impact of COVID-19 on a Pragmatic, Cluster Randomized Clinical Trial for Fibromyalgia. Clinical Trials

– Integrating pragmatism and rigor - impact of the pandemic on a randomized controlled trial of a complex intervention. Clinical Trials

– Conceptual Design and Protocol for the Acute to Chronic Pain Signatures Program (A2CPS). Clinical Trials

– Fibromyalgia Transcutaneous Electrical Nerve Stimulation in Physical Therapy Study (FM TIPS): an embedded pragmatic clinical trial in physical therapy clinics. Interventional approaches to pain management

Beck, Meghan

Longitudinal Assessment of Postmastectomy Sensory Disturbances: Distinguishing between Painful Neuropathic Features and Numbness Alone. Measurement of Pain and its impact

Bedair, Hany

Thalamic Neurometabolite Alterations in Patients with Knee Osteoarthritis Before and After Total Knee Replacement. Pain Imaging

- Bell, Tyler
Chronic Pain and Locus Coeruleus Integrity in Older Adults. Pain Imaging
- Belmadani, Abdelhak
Activation of Keratinocyte Gq-linked G-Protein Coupled Receptors Regulates Degeneration of Cutaneous Nerves. Basic Science
- Bendele, Michelle
Mechanisms of Stem Cell-mediated Antinociception. Basic Science
- Beneciuk, Jason
Identifying Treatment Effect Moderators in the TARGET Trial: A Secondary Analysis. Clinical Trials
- Benjamin, Amy
Dysmenorrhea and associated psychosocial and functional impact prior to the development of chronic pelvic pain. Measurement of Pain and its impact
- Benson, Christopher
ASICs are Required for Immediate Exercise-Induced Muscle Pain (IEIP), but not Delayed Onset Muscle Soreness (DOMS). Interventional approaches to pain management
- Berardi, Giovanni
Tolerance to submaximal eccentric exercise in women with and without fibromyalgia, moving away from anecdotal beliefs. Physical Therapy
- Bergan, Courtney
Neuroinflammatory and functional connectivity signatures in radicular and axial chronic low back pain. Pain Imaging
- Berry, Michael
– Dynamic functional connectivity underlying temporal summation of pain in fibromyalgia. Pain Imaging
– Brain metabolite concentration in pain processing regions is linked with multidimensional morbidity in fibromyalgia - a voxel-wise 3D MR Spectroscopic Imaging study. Basic Science
- Bhandari, Rashmi
Assessing disparities on caregiver factors known to affect children's pain and outcomes. Pain and Disparities
- Bialosky, Joel
Examining somatosensory function by age, testing site, and modality. Geriatric Pain
- Birenbaum, Julia
Prefrontal cortico-thalamic regulation of pain by mindfulness meditation. Pain Imaging
- Bishop, Mark
Resilience to acute musculoskeletal pain: resting-state functional connectivity of regions associated with gray matter density differences following induction of low-back pain. Pain Imaging
- Boehnke, Kevin
Cannabidiol Use for Fibromyalgia: Prevalence of Use and Perceptions of Effectiveness in a Large Online Survey. Complementary and Integrative Medicine
- Boissoneault, Jeff
– Task-dependent functional connectivity of pain-related brain regions is related to magnitude of placebo analgesia. Pain Imaging
- Resilience to acute musculoskeletal pain: resting-state functional connectivity of regions associated with gray matter density differences following induction of low-back pain. Pain Imaging
- Bojilov, Vivie
Multi-Muscle Deep Learning Segmentation to Automate the Quantification of Muscle Fat Infiltration in Cervical Spine Conditions. Pain Imaging
- Bonham, Adrienne
Dysmenorrhea and associated psychosocial and functional impact prior to the development of chronic pelvic pain. Measurement of Pain and its impact
- Booker, Staja
Pain catastrophizing mediates ethnic/race group differences and pain-related outcomes in adults with or at risk for knee osteoarthritis. Pain and Disparities
- Boone, Casey
Atlas PainCare: Preliminary feedback on a chronic pain interprofessional mentoring program. Pain Education
- Boring, Brandon L.
– Daily, but not lifetime discrimination is associated with greater pain interference in those with chronic pain. Pain and Disparities
– Discrimination Experienced by Latinx American College Students is Associated with Enhanced Temporal Summation of Pain. Pain and Disparities
- Borsook, David
– The role of hippocampus and amygdala morphology in memory bias of learned fear in youth with chronic pain. Pain Imaging
– Probing white matter microstructure in youth with chronic pain. Pain Imaging
- Bourchtein, Elizaveta
Pre-treatment depressive symptoms predict physical performance among pediatric pain program participants. Interventional approaches to pain management
- Boyd, Jacob
Orofacial Allodynia Induced by High Omega-6 Diet. Basic Science
- Bradt, Joke
Atlas PainCare: Preliminary feedback on a chronic pain interprofessional mentoring program. Pain Education
- Brandow, Amanda
– History of Pain is Associated with Hospitalization and Severe Course of COVID-19 in Children with Sickle Cell Disease. Pain in Sickle Cell Disease
– Transcriptional Inflammatory Signatures Differentiate Baseline Health from Acute Pain in Sickle Cell Disease Patients. Pain in Sickle Cell Disease
- Brett, Matthew
Parallel ascending spinal pathways for affective touch and pain. Basic Science
- Brooks, Taylor
– Effects of paclitaxel in mitochondrial function and cellular phenotype in human peripheral blood mononuclear cells and monocytes. Basic Science

- IRE α -XBP1s activation in leukocytes is associated with the level of exposure to paclitaxel in CIPN patients. Basic Science
- Brown, Rebecca
- Family-centered empowerment for perioperative stress and pain management – using novel design thinking approaches. Psychosocial
- Brummett, Chad
- Conceptual Design and Protocol for the Acute to Chronic Pain Signatures Program (A2CPS). Clinical Trials
- Brutcher, Robert
- Naloxone Education: Patient Perspectives. Pain Education
- Bryan, Madison
- Task-dependent functional connectivity of pain-related brain regions is related to magnitude of placebo analgesia. Pain Imaging
- Buchanan, Taylor
- Opioid Use Predicts Self-Reported Mobility in Older Adults with Chronic Lower Back Pain. Geriatric Pain
- The relationship between optimism and physical health functioning in chronic low back pain and pain-free individuals. Psychosocial
- Predictors for Pain Severity, Interference, and the Use of Tertiary Providers among Community Dwelling, Southern Adults. Pain and Disparities
- Buenaer, Luis
- Sleep moderates the effect of positive affect on circulating interleukin-6 in patients with temporomandibular disorder. Psychosocial
- Buford, Thomas
- Predictors for Pain Severity, Interference, and the Use of Tertiary Providers among Community Dwelling, Southern Adults. Pain and Disparities
- Opioid Use Predicts Self-Reported Mobility in Older Adults with Chronic Lower Back Pain. Geriatric Pain
- The relationship between optimism and physical health functioning in chronic low back pain and pain-free individuals. Psychosocial
- Bunnell, Bruce
- Modeling Joint Pain on a Chip: integrating sensory neurons in the microJoint to model osteoarthritis. Basic Science
- Burns, John
- Conceptual Design and Protocol for the Acute to Chronic Pain Signatures Program (A2CPS). Clinical Trials
- Burton, Michael
- Use of Integrated Optical Clearing and 2-Photon Imaging to Investigate Sex Differences in Neuroimmune Interactions after Peripheral Nerve Injury. Pain Imaging
- Bush, Nicholas
- Task-dependent functional connectivity of pain-related brain regions is related to magnitude of placebo analgesia. Pain Imaging
- Resilience to acute musculoskeletal pain: resting-state functional connectivity of regions associated with gray matter density differences following induction of low-back pain. Pain Imaging
- Buvanendran, Asokumar
- Conceptual Design and Protocol for the Acute to Chronic Pain Signatures Program (A2CPS). Clinical Trials
- Callaway, Clifton
- Comparison of musculoskeletal pain severity and pain interference using ecological momentary assessment: a longitudinal analysis. Measurement of Pain and its impact
- Campbell, Christopher
- Inhibition of Heat shock protein 90 in the Spinal Cord Enhances Opioid Anti-Nociception by Disabling an Inhibitory GABA Circuit. Pain and Disparities
- Campbell, Claudia
- Sleep moderates the effect of positive affect on circulating interleukin-6 in patients with temporomandibular disorder. Psychosocial
- Campbell, Grace
- Using the Time-Varying Effect Model (TVEM) to Examine Dynamic Associations Between Daily Pain and Mood Assessments During 4-cycles of Chemotherapy for Gynecologic Cancer. Nursing
- Campbell, Zachary
- The impact of inflammatory mediators on the landscape of nascent translation in the dorsal root ganglion. Basic Science
- Cardoso, Josue
- Movement-Evoked pain is differentially associated with physical and psychological functioning in non-Hispanic Blacks vs. non-Hispanic Whites. Psychosocial
- Pain catastrophizing mediates ethnic/race group differences and pain-related outcomes in adults with or at risk for knee osteoarthritis. Pain and Disparities
- Castillo, Zachary
- Use of Integrated Optical Clearing and 2-Photon Imaging to Investigate Sex Differences in Neuroimmune Interactions after Peripheral Nerve Injury. Pain Imaging
- Castonguay, William C.
- CGRP antibody rescues tactile sensitization induced by mild traumatic brain injury in mice. Basic Science
- Caterina, Michael
- Investigating post-transcriptional mechanisms of neuropathic pain. Basic Science
- Cecchi, Guillermo
- Preliminary Evaluation of Phenotypic Features from Clinical Interactions. Measurement of Pain and its impact
- Chan, Kiara
- Increasing Age Alters the Development of Gait Compensations Following Meniscal Injury in Rats. Basic Science
- Chang, Andrew
- Conceptual Design and Protocol for the Acute to Chronic Pain Signatures Program (A2CPS). Clinical Trials

- Chang, Christina
Computer vision reimages rigor of APPT pain site and surface area measurement. Measurement of Pain and its impact
- Chang, Phoebe
Mechanisms of Stem Cell-mediated Antinociception. Basic Science
- Chapa, Brett
Mechanisms of Stem Cell-mediated Antinociception. Basic Science
- Chapman, Benjamin
Dysmenorrhea and associated psychosocial and functional impact prior to the development of chronic pelvic pain. Measurement of Pain and its impact
- Chen, Antonia
Thalamic Neurometabolite Alterations in Patients with Knee Osteoarthritis Before and After Total Knee Replacement. Pain Imaging
- Chen, Yun-Yun K.
Longitudinal Assessment of Postmastectomy Sensory Disturbances: Distinguishing between Painful Neuropathic Features and Numbness Alone. Measurement of Pain and its impact
- Cheng, Joshua C
Dynamic functional connectivity underlying temporal summation of pain in fibromyalgia. Pain Imaging
- Chidambaran, Vidya
Family-centered empowerment for perioperative stress and pain management – using novel design thinking approaches. Psychosocial
- Chilukuri, Priyanka
Peripheral kappa opioid receptor activation drives cold hypersensitivity in mice. Basic Science
- Chimenti, Ruth
– Integrating pragmatism and rigor - impact of the pandemic on a randomized controlled trial of a complex intervention. Clinical Trials
– Fibromyalgia Transcutaneous Electrical Nerve Stimulation in Physical Therapy Study (FM TIPS): an embedded pragmatic clinical trial in physical therapy clinics. Interventional approaches to pain management
– Reduction in movement-evoked pain and fatigue during initial Transcutaneous Electrical Nerve Stimulation treatment predicts responders in women with fibromyalgia. Physical Therapy
– Impact of COVID-19 on a Pragmatic, Cluster Randomized Clinical Trial for Fibromyalgia. Clinical Trials
- Cho, Sung Kwon
Modeling Joint Pain on a Chip: integrating sensory neurons in the microJoint to model osteoarthritis. Basic Science
- Choi, Seungwon
Parallel ascending spinal pathways for affective touch and pain. Basic Science
- Christoph, Thomas
Characterization of voltage gated calcium channels in human sensory neurons. Basic Science
- Chung, Man-Kyo
Capsaicin-induced depolymerization of axonal microtubules mediates analgesia for trigeminal neuropathic pain. Craniofacial Pain
- Ciaramidaro, Angela
Brain-to-brain patient-clinician connectivity is directionally modulated by chronic low back pain therapy: an electroencephalography hyperscan approach. Pain Imaging
- Clark, David J.
Pain differences in sympathetic nervous system reactivity during simple and complex walking tasks: potential cerebral mechanisms. Pain Imaging
- Clauw, Daniel
– Insular excitatory-inhibitory balance and amplification of functional connectivity during sustained pressure pain is associated with hyperalgesia and temporal summation in chronic pain. Pain Imaging
– Conceptual Design and Protocol for the Acute to Chronic Pain Signatures Program (A2CPS). Clinical Trials
- Cody, Shameka
Symptoms of Depression and Insomnia Help Explain the Relationship Between Stigma and Chronic Pain Severity in People with HIV. Pain and Disparities
